INDICATIONS

For the treatment of heartwater, tick-borne Gallsickness (anaplasmosis), pneumonia, footrot, joint-ill and navel-ill in stock and strangles in horses.

STORAGE INSTRUCTIONS

Store in a cool place, but do not freeze. As with all oxytetracycline HCl solutions darkening may occur, but there is no loss of efficacy.

COMPOSITION

Each ml contains:

Oxytetracycline Hydrochloride 125 mg

WARNINGS

- DO NOT USE IN DOGS.
- Allow 48 hours between last treatment and milking for human consumption. Do not slaughter animals for human consumption within 7 days of last treatment.
- Keep out of reach of children, uninformed persons and animals.
- Although this remedy has been extensively tested under a large variety of conditions failure thereof may ensue as a result of a wide range of reasons. If this is suspected, seek veterinary advice and notify the registration holder.

Intravenous injections

When the intravenous route is used the injection should be given slowly into the selected vein and at the first signs of discomfort or restlessness on the part of the animal it should be halted momentarily. A small gauge needle should preferably be used.

Repetition of treatment

Treatment must be repeated daily at the prescribed dosages until full recovery has taken place.

DIRECTIONS FOR USE - use only as directed
