

Rumix

FOR ANIMAL USE ONLY

Rumix

Reg. No. G0528 (Act 36/1947)

Powder

Rumix aims at restoring normal ruminal function. By restoring normal function, ruminal movements are re-established, digestion is regulated, appetite improved and feed conversion promoted.

COMPOSITION:

Sodium Propionate 15 % *m/m*

Molasses Products 47,5 % *m/m*

WARNING:

Keep out of reach of children, uninformed persons and animals. Although this remedy has been extensively tested under a large variety of conditions, failure thereof may ensue as a result of a wide range of reasons. If this is suspected, seek veterinary advice and notify the registration holder.

INDICATIONS:

Indigestion and ruminal disturbance following tickborne gallsickness, redwater, mastitis, footrot and other infections, digestive disturbances, stress, transport, change of food, low grade roughage, poisonous plants and recurring bloat.

Rumix should also be employed as an appetite stimulator in cattle and sheep, where animals are fed on low grade roughage, winter grazing and with sudden changes of food, such as entering feedlots or translocation.

DIRECTIONS FOR USE – Use only as directed

DOSAGE

Adult cattle – ruminal disturbances:

If still eating: 100 g (one sachet) for 2 – 4 days in food.

If not eating: 200 g (two sachets) in 1 L of water twice daily for 2 days.

Digestive regulation: dose 50 g (½ sachet) per animal per day.

Feedlots

Dose one sachet dissolved in 1 L water on arrival followed by 50 g of Rumix per animal per day for 7 – 10 days, until ruminal mobility has been established, or until the animal eats the required mass of ration.

Young cattle: Half of above dose.

Adult sheep / calves: A quarter sachet (25 g) twice daily for 4 days.

Weaners: 10 g (one tablespoonful) in food twice daily for 4 days.

PRESENTATION:

100 g sachets.
